SUMMARY

Computer Science undergraduate at Vishwakarma Institute of Technology with experience in AI/ML, full-stack development, and computer vision. Skilled in Python, React, Node.js, Fast API, and machine learning frameworks including TensorFlow and PyTorch. Built industry projects involving document intelligence, image processing, and multimodal AI systems. Driven about developing specific scalability outcomes, AI-driven solutions to real-world problems.

EDUCATION

- Vishwakarma Institute of Technology** Pune, Maharashtra
Bachelor of Engineering in Computer Science; Grade: 9.09 June 2024 – March 2028
- Delhi Public School** Nagpur, Maharashtra
High School Diploma; Grade: 85.5 June 2022 -March 2024

PROJECTS

- Wire Surface Scanner | Industry Project| Bekaert | July 2026**
 - Lead a team that developed an industrial wire surface inspection system for automated defect detection using Python, TensorFlow, and FastAPI.
 - Integrated Raspberry Pi 5 and camera modules for real-time image acquisition and quality inspection workflows. [GitHub](#)
- Contact Builder from Various Sources | Industry Project | Passion Infotech Pvt. Ltd. | Dec 2025**
 - Lead the team that developed an AI-powered contact intelligence platform using React, TypeScript, Node.js, and PostgreSQL.
 - Built document processing pipelines using Gemini API, OCR, and NLP models to extract contact information from resumes and business documents. [GitHub](#)
- H.U.M.A.N.E. (Hyper-Understanding Multi-modal Assistant with Neural Emotions) |Jun 2026**
 - Built using Python, Whisper, Hugging Face models, Flask, JavaScript, and Web technologies.
 - Developed a multimodal AI assistant capable of processing voice, image, and text inputs for intelligent conversations. [GitHub](#)
